

Geolink & CETel Group officially announced the launch of their Media activity in Middle East.

Local sales representative and team based in the Middle East have been introduced to partners and clients during two major events: CABSAT and the Geolink-CETel Conference on Media Mobile Solutions at the Inmarsat Lab in Dubai.

Geolink Media Branch services are now available in our Middle East Office:

- Media ClipWay software solutions for TV & Radio
- VSAT solutions (Ku / Ka / C Band)
- Mobile VSAT (Ku / Ka / C Band)
- Mobile Satellite Solutions (Inmarsat / Thuraya)

Our experienced Media team will advise and support you along your project.

MEDIA CLIPWAY SOFTWARE SOLUTIONS:

Designed with the feedback of field Radio and TV journalists, ClipWay Media software solutions perfectly match the needs and Broadcast standards of Media professionals.

With an exclusive link aggregation integrated directly into the software (up to 4 IP links), ClipWay solutions for Media makes HD transmission available on very mobile solutions using Inmarsat BGAN antennas.

Using an optimized and aggressive protocol especially written for narrow bandwidth, ClipWay software solutions guarantee a mostly efficient and cost-effective transmission for audio & video reports sent.

Scalable, light-weighted, with a customizable and user-friendly GUI, ClipWay software solution is today the reference for the most demanding Media professionals using mobile solutions.
