ClipWay Radio guarantees you flexibility and efficiency at the most affordable cost.

ClipWay Radio: easy to use, efficient and reliable

STORE & FORWARD

Pre-recorded radio files

LIVE

Live, optimized for low-speed links

ClipWay Radio Assets

- News Gathering Service
- A 24/7 Technical Support
- Optimization of reception conditions and requirements
- Project Management

ClipWay Radio

ClipWay Radio meets the most demanding requirements of field reporters and technical teams:

- Provides broadcast quality audio compression
- Allows transmission with reliability and optimization over any IP connection
- Optimizes communication costs
- Meets the Broadcast standards requirements of Radio stations.

ClipWay Radio combines essential functions and services in one solution:

- 32 à 128 kbps Live broadcasting
- Files transmission
- A reception server software application
- Dedicated services to Media professionals.

A server-based software:

- Receives all live and pre-recorded transmissions via IP
- Manages up to 24 store & forward transmissions simultaneously
- Provides automatic backup for received files
- Live transmission directly broadcasted via a PC audio output or an optional audio card.
